29/04/16 Fun Run Cross Country
05/05/16 Mothers Day Stall
27/05/16 Under Eights Day
17/06/16 Woodford Show Visit
15/06/16 Junior Sports Day
08/12/16 School concert

Geography

In Term 2 the students will be drawing a plan of the Prep Playground using the perspective of a bird's eye view.
Main learning goals for Prep in term 2

Maths
In term 2 the students will count a collection of items and use the terms "more", "less" and the "same" to compare these collections. They will name simple shapes like "circle", "square", "rectangle" and "triangle". They will describe simple features of these shapes using words like "curved" and "straight". Students will use the language of location and movement to give simple directions.

English
In term 2 the students will enjoy stories and learn to retell them using a beginning, middle and end. They will look at how characters are created through actions and illustrations. The students will draw pictures to show the sequence of a favourite story and write a simple sentence to match the drawing. The students will learn to match a written letter with each sound.

Science
In Term 2 the students will use their senses to explore the properties of different materials. They will use this knowledge to make a wind ornament, focusing on the terms waterproof and strong.

History
In Term 2 the students will use the question they asked a family member about their past to relate a story from their family to a group of other students. They will also use their family photo to compare their family to one of the other student's families discussing similarities and differences.
